## PROJECTS

---

### STUDY NOTION

[View in GitHub](#)

- Developed a dynamic and responsive web application, Study Notion, utilizing the MERN (MongoDB, Express.js, React.js, Node.js) stack, showcasing proficiency in both front-end and back-end technologies.
- Implemented robust user authentication and authorization mechanisms to enhance application security and provide personalized, role-based access for users.
- Crafted a visually appealing and user-friendly interface using Tailwind CSS, ensuring modern design standards, and seamlessly integrated Razorpay for secure online transactions within the application.

### ShopHub

[View in GitHub](#)

- Developed ShopHub, an e-commerce platform, using React with Redux, demonstrating expertise in efficient state management for seamless data flow and enhanced user interactions.
- Utilized Redux to create a scalable and responsive web design, contributing to a dynamic and user-friendly shopping experience on the platform.

### NewsPulse

[View in GitHub](#)

- Built a dynamic news aggregation platform utilizing modern web technologies.
- Integrated NewsAPI to fetch real-time news articles from various categories.
- Designed an intuitive & visually appealing user interface with responsive design principles.
