PROJECTS

STUDY NOTION   View in GitHub

- Developed a dynamic and responsive web application using the MERN (MongoDB, Express.js, React.js, Node.js) stack, showcasing proficiency in both front-end and back-end technologies.
- Implemented robust user authentication and authorization mechanisms, enhancing application security and providing personalized and role-based access for users.
- Crafted a visually appealing and user-friendly interface using Tailwind CSS, ensuring a modern design, and seamlessly integrated Razorpay for secure online transactions within the application.

ShopHub   View in GitHub

- Developed ShopHub using React with Redux, demonstrating expertise in efficient state management for seamless data flow and enhanced user interactions.
- Utilized Redux to create a scalable and responsive web design, contributing to a dynamic and user-friendly shopping experience on the e-commerce platform

CourseVista   View in GitHub

- Engineered a dynamic web application CourseVista using React and hooks, showcasing advanced proficiency in leveraging stateful functional components to create a responsive and interactive learning platform.
